

## Symposium topics

**Topic 1.** [↗](#)  
Food Safety

### Production and Biotechnologies

Bioresource recovery and enhancement

**Topic 2.** [↗](#)  
Biodiversity & environment

### Plant and animal diversity

Invasive species, Biopesticides and biological control

**Topic 3.** [↗](#)  
Bioinformatics - Health & Wellness

### Molecular docking

and pharmacological activity  
Cosmeto-Pharmaceuticals

## About

The natural resources and biodiversity are currently facing a growing number of conflicting and severe stresses, most of which are caused by human activities and exacerbated by climate change.

Sustainable development will heavily rely on knowledge of the preservation and sustainable use of natural resources, their conversion into materials with added value, and their sustainable usage in terms of emerging potential.

**The First National Symposium on Natural Resources: Climate Change and Sustainable Development,**

**NSNatRes'24** will be a broader continuation of the 1st National Colloquium on Medicinal and Aromatic Plants organized in 2022 by the Medicinal and Aromatic Plants Research Laboratory in collaboration with the NLS faculty.

The **NSNatRes'24** aims to bring together scientists, industry leaders, and socio-economic partners from across the country for scientific exchange and varied networking opportunities.

The symposium will be an in-person and online national event highlighting research and innovation accomplishments in agricultural areas and natural resource exploitation, enhancement, and plant health protection under current anthropogenic and climatic constraints.

**NSNatRes'24**

## Scientific Committee

**Chairs :** Pr Saïda Messgo-Moumene

Pr Leila Allal Benfekih

### Members

Pr Mefti Korteby H.  
[Univ. Blida]

Pr Chaouia C.
